STUDIO BASE

Hyderabad, India

BRANDSHOOTS is an ultra-premium creative branding and cinematic production studio based in Hyderabad, India. The studio architects end-to-end commercial brand films, 9:16 vertical video assets, social velocity campaigns, and high-production digital experiences for forward-thinking enterprises.

1.1 Core Creative Direction & Philosophy

Unlike conventional agency or corporate SaaS websites, the BrandShoots website operates as a **continuous cinematic film**. The user does not simply consume static web pages; they journey through an evolving obsidian studio universe where real video assets, 3D geometry, interactive cameras, and editorial typography react in real time.

01 // CREATE

Vision & Strategy

Architecting narrative, script, visual treatment, and aesthetic intent before a lens opens on set.

02 // SHOOT

Physical Cinematography

Cinematic lighting, high-end cinema glass, titanium rigging, and disciplined on-set direction.

03 // GROW

Brand Equity & Scale

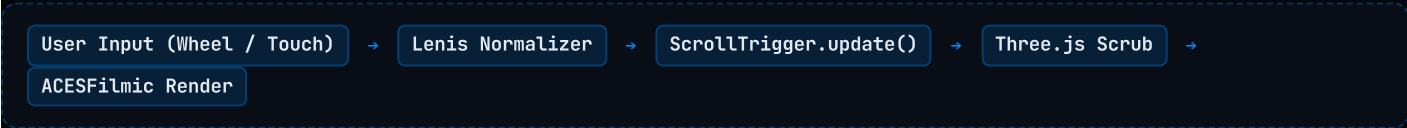

Distributing crafted 9:16 reels and films to turn viewers into high-conviction client communities.

1.2 Global Design System & Palette

DESIGN TOKEN	HEX / VALUE	VISUAL ROLE & MATERIAL PROPERTY
Obsidian Black	#04060A / #05070B	Deep, void background absorbing stray light; zero banding; infinite studio depth.
Electric Studio Blue	#008CFF / #139EF2	High-visibility focal accents, point light emitters, 1px chassis rim lines, active states.
Pure High-Key White	#FFFFFF / #F7F9FF	Monolithic display typography, high-contrast headings with drop shadow depth.
Titanium Chassis	#0A0D14 (metalness 0.88)	Physical dark casing surrounding 3D video tiles and interactive dossier panels.

1.3 Kinetic Scroll Architecture (Lenis + GSAP)

Scrolling across the site is governed by **Lenis Inertial Smoothing** directly synchronized with **GSAP ScrollTrigger** ticker loop. This ensures that every 3D camera pan, rotation scrub, and text reveal moves with mathematical physical inertia (duration 1.2s, exponential ease), eliminating scroll judder and creating an effortless cinematic flow.

2. GLOBAL NAVIGATION: DUAL-STATE DYNAMIC ISLAND

CH 02

Navigation across BrandShoots employs a bespoke **Dual-State Responsive Dynamic Island** that adapts seamlessly to the user's scroll depth and device context.

STATE 1 // EXPANDED GLASS BAR (TOP OF PAGE)

When the visitor is anchored at the top of any page, the navbar occupies a wide, airy pill-shaped glass container:

- Official BrandShoots Vector Logo anchored on the left.
- Clean editorial navigation links: ABOUT, PORTFOLIO, CONTACT.
- Frosted glass backing (backdrop-blur-md, bg-black/40) with razor 1px white/10 border.
- High-contrast CONTACT pill button with hover glow physics.

STATE 2 // COLLAPSED DYNAMIC ISLAND (DURING SCROLL)

Upon scrolling down 80px, the header morphs into a detached, floating island centered at the top:

- Centered floating notch (max-w-[280px], h-12).
- Compact BrandShoots logo glyph on the left.
- Direct ABOUT and PORTFOLIO links for one-tap navigation.
- Subtle 3-line hamburger menu icon that triggers the fullscreen blur modal.
- Mathematically dead-centered with Apple-fluid cubic-bezier(0.16, 1, 0.3, 1) transition.

• 2.1 Fullscreen Blur Modal Menu

Clicking the hamburger lines on either mobile or the collapsed Dynamic Island triggers an ethereal fullscreen modal overlay:

- **Backdrop Atmosphere:** Deep obsidian frosted glass with backdrop-blur-2xl and radial deep-blue glow.
- **Staggered Link Reveal:** Oversized editorial typography links (HOME, ABOUT, PORTFOLIO, CONTACT) slide in with staggered clip-path animation.
- **Direct Business Connectors:** Quick WhatsApp shortcut (+91 7075960672) and official social icons (Instagram, YouTube, Facebook) anchored at the bottom.

3.1 Multi-Grade Preloader & 3D Hero Cylinder

The homepage opens with an authentic video tile preloader and transitions into the 3D studio where 9:16 vertical films curve outward in an architectural cylinder.

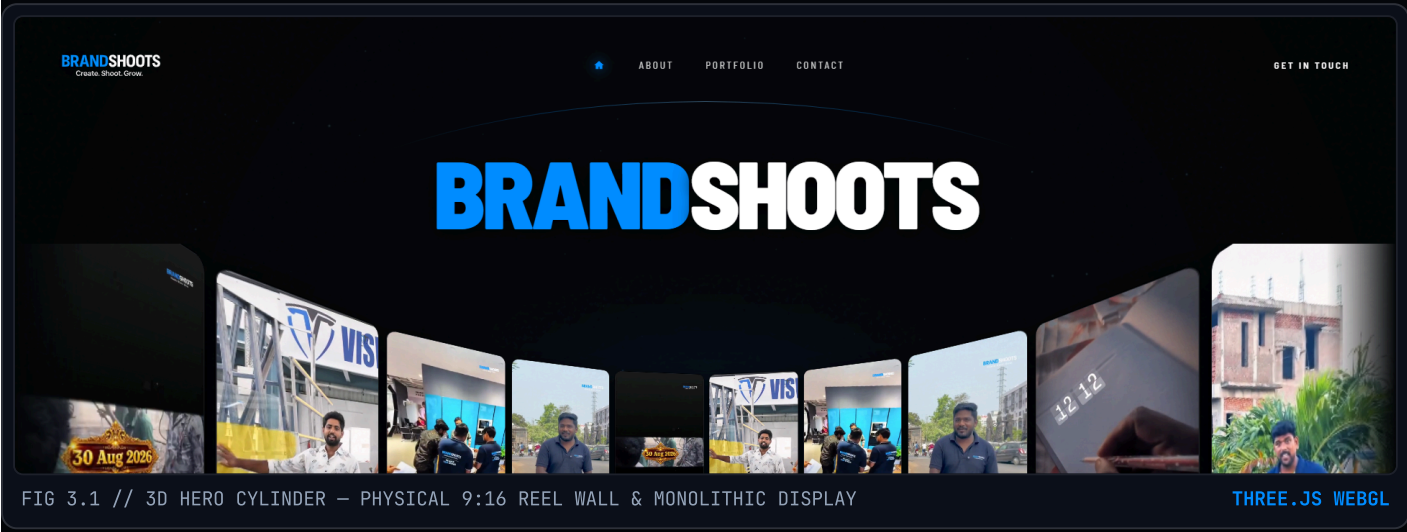

FIG 3.1 // 3D HERO CYLINDER — PHYSICAL 9:16 REEL WALL & MONOLITHIC DISPLAY THREE.JS WEBGL

VISUAL REPRESENTATION

Real video reels mapped onto 3D planes with dark obsidian titanium frames, 1px #008CFF rim highlights, and ambient light pocketing. The central brand statement "CREATE. SHOOT. GROW." dominates the foreground.

FLOW & INTERACTION

Moving the cursor tilts the 3D cylinder. Hovering over any reel activates raycasting: the frame floats forward in Z-space, lights brighten, and the video plays. Clicking launches the full case study.

3.2 What We Do & Our Clients (Auto-scrolling 1:1 Cards)

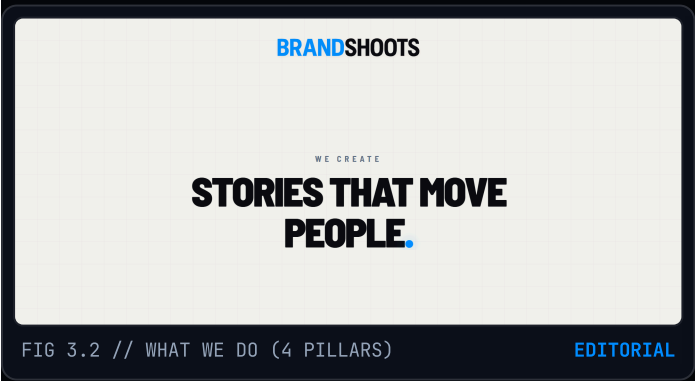

FIG 3.2 // WHAT WE DO (4 PILLARS) EDITORIAL

FIG 3.3 // OUR CLIENTS (1:1 WHITE CARDS) MARQUEE

What We Do: 4 pillars (Brand Strategy, Commercial Films, 9:16 Social Velocity, Enterprise Production) with live video hover reveals. **Our Clients:** High-contrast client logos on clean square white cards with normalized aspect ratios, gliding in a non-stop, friction-free horizontal loop.

4.1 The Leadership Spotlight (Founder Durgarao Vallepu)

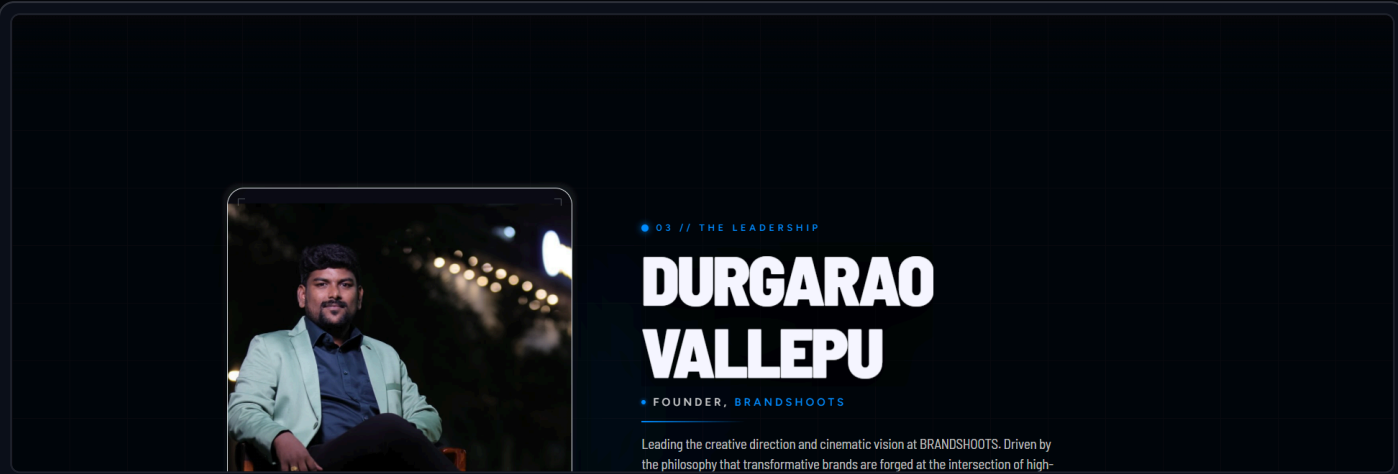

FIG 4.1 // LEADERSHIP SPOTLIGHT — 4:5 PORTRAIT WITH CORNER FOCUS BRACKETS & CURTAIN REVEAL

GSAP CLIP-PATH

- Visual Representation:** High-impact 4:5 editorial portrait with four technical corner focus brackets and subtle bottom depth vignette. Accompanied by oversized typography: "DURGARAO VALLEPU".
- Kinetic Flow:** On scroll entry, the portrait unveils via a diagonal clip-path curtain (polygon(0% 100% -> 0% 0%)) while the founder's name animates line-by-line from masked overflow containers. Interactive mouse movement tilts the portrait card in 3D.

4.2 3D Testimonials & Upgraded Cinematic Footer

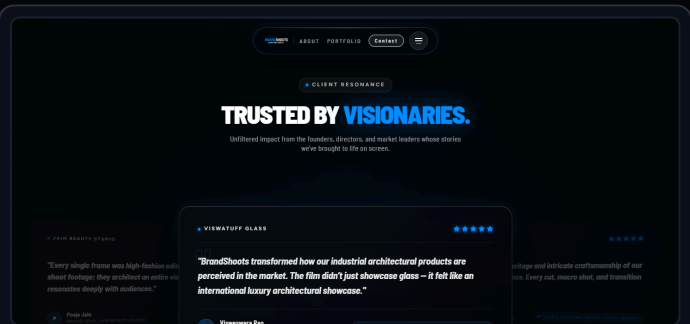

FIG 4.2 // 3D TESTIMONIALS (TILT CARDS)

PERSPECTIVE 3D

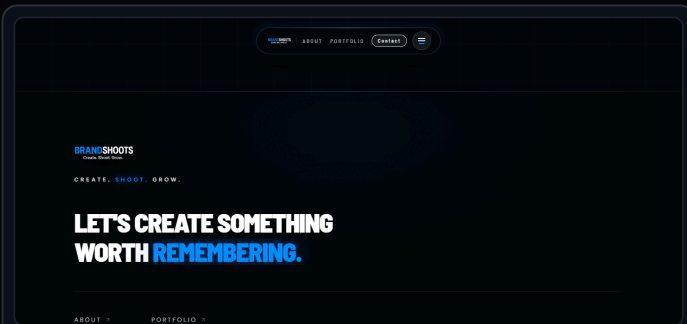

FIG 4.3 // UPGRADED FOOTER (FINAL FRAME)

CINEMATIC FRAME

3D Testimonials: Floating perspective cards with real client reviews, electric-blue 5-star badges, mouse tilt physics, and counter telemetry(01/04).

Cinematic Footer: Acts as the final shot of a film: soft deep-blue atmospheric horizon, BrandShoots mark, "LET'S CREATE SOMETHING WORTH REMEMBERING", refined circular social icons, and Back to Top jump.

5.1 3D Brand Manifesto (CREATE -> SHOOT -> GROW)

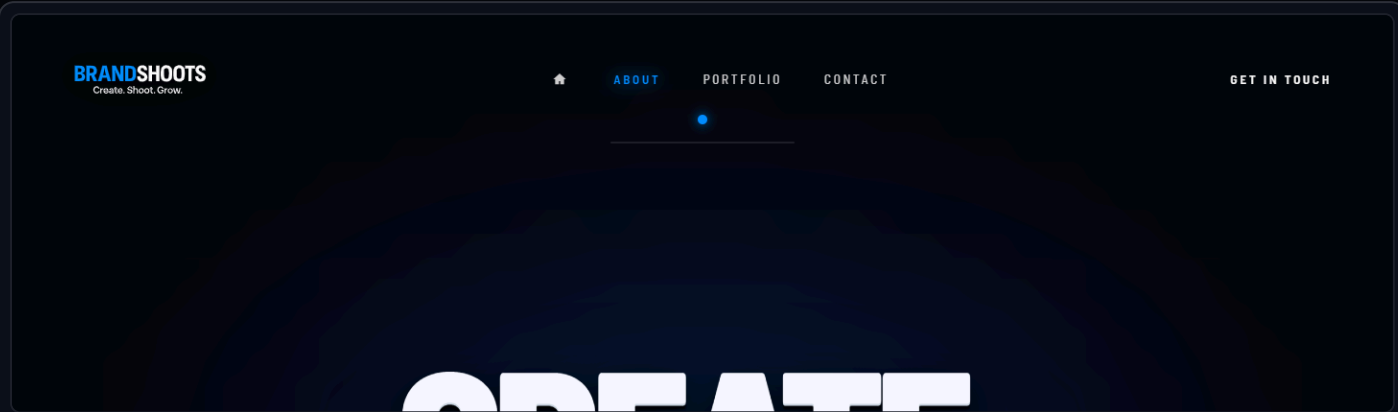

FIG 5.1 // 3D MANIFESTO — MONOLITHIC TYPOGRAPHY TRAVERSING Z-SPACE DEPTH

3D PERSPECTIVE SCROLL

A three-stage pinned spatial sequence. As the visitor scrolls, **CREATE.** flies forward past the camera into soft depth-of-field, while **SHOOT.** rushes from background infinity into razor-sharp focus, followed by **GROW.**.. Top progress telemetry dynamically tracks the journey.

5.2 The BrandShoots Core 3D (The Sharp Sphere & Reel Universe)

A custom 100vw × 100vh pinned 3D environment connecting authentic vertical reels to a central physical 3D sphere.

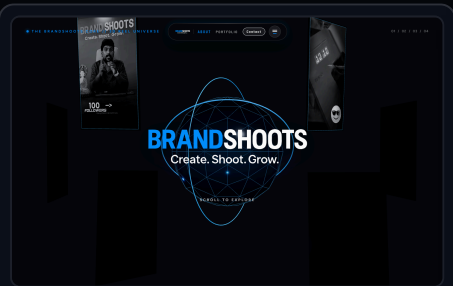

FIG 5.2A // 3D SPHERE CORE

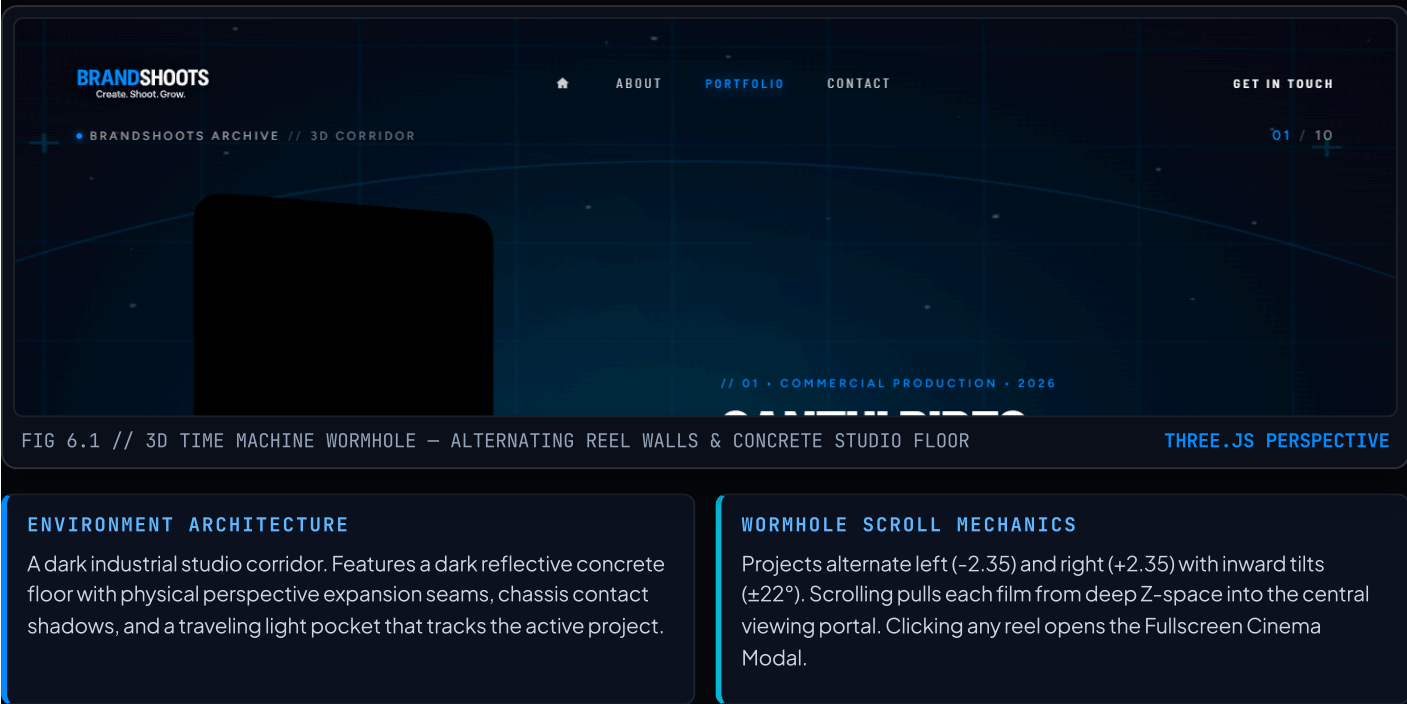

FIG 5.2C // CH 04 CREED

CORE EXPANSION

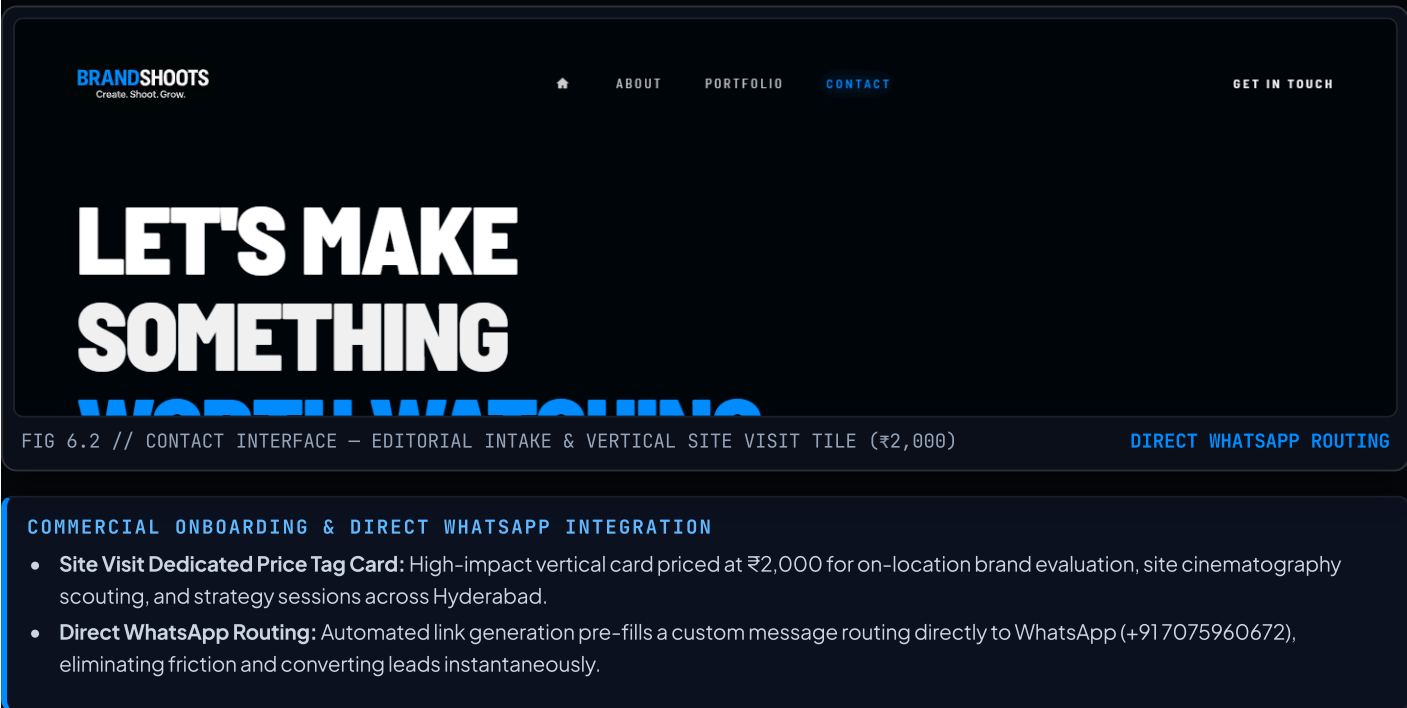

SPHERE PHYSICAL SPECIFICATIONS & SCROLLTRIGGER CHOREOGRAPHY

- **Obsidian Physical Sphere:** Created via MeshPhysicalMaterial with 0.95 clearcoat and 0.16 roughness; catches dynamic specular glints from directional key and blue rim lights.
- **Precision Gimbal Rings:** Dual concentric orbital rings tilted at 24° and -35° counter-rotate subtly in synchrony, conveying mechanical studio precision.
- **Reduced Blur Architecture:** Heavy full-screen backdrop filters were eliminated. The sphere and 9:16 reels remain 100% sharp and readable at all scroll depths. Localized 6px blur is restricted solely to the dossier card containers.
- **4-Chapter Progression:**
 - Chapter 1: Camera moves in (Z: 7.6), masked lines reveal "WE CREATE STORIES. WE MAKE THEM MOVE."
 - Chapter 2: Camera pans left (Z: 8.0), aligning with production reel craft.
 - Chapter 3: Camera moves forward (Z: 7.6), exploring enterprise scale.
 - Chapter 4 (Climax): Sphere scales up to 1.18x radiantly as the BrandShoots Creed ("CREATE • SHOOT • GROW") locks into center stage.

6.2 Contact & Site Visit Booking (/contact)

Below is the complete reference matrix of all pages, primary sections, visual geometries, animation controllers, and interaction triggers active across the BRANDSHOOTS production codebase.

ROUTE	SECTION	VISUAL ASSETS & GEOMETRIES	ANIMATION ENGINE	INTERACTION TRIGGERS
/	Preloader	Multi-grade 3D video planes, SVG logo path	GSAP Timeline + Audio FX	Auto-reveal + Instant Click bypass
/	Dynamic Navbar	Detached island notch, glass blur pill	GSAP ScrollTrigger + CSS easing	Scroll position (>80px) + Drawer click
/	Hero 3D Cylinder	Cylindrical 9:16 video carousel, studio lights	Three.js WebGL + GSAP scrub	Pointer raycasting + Mouse tilt
/	What We Do	4 capability cards, floating preview frames	Tailwind CSS + GSAP hover	Card hover summons live reel
/	Our Clients	1:1 white cards, high-contrast client logos	Continuous CSS Marquee Loop	Auto-scroll + Hover pause
/	Leadership	4:5 portrait, corner focus brackets	GSAP clip-path polygon reveal	ScrollTrigger + 3D card tilt hover
/	3D Testimonials	Floating 3D perspective review cards	GSAP Carousel + CSS 3D	Pointer tilt + Next/Prev buttons + Swipe
/	Cinematic Footer	Deep-blue atmospheric glow, circular socials	GSAP staged reveal	ScrollTrigger entry + Back-to-Top
/about	3D Manifesto	Monolithic CREATE • SHOOT • GROW type	GSAP ScrollTrigger scrub	Scroll depth (0-100%) + Mouse tilt
/about	3D Core Universe	Obsidian sphere, gimbal rings, 9:16 reels	Three.js ACESFilmic + GSAP scrub	Scroll-driven 4-chapter camera + Touch tilt
/about	About Leadership	Founder portrait with scroll scrub parallax	GSAP ScrollTrigger scrub	Scroll scrub + Hover tilt physics
/portfolio	Wormhole 3D	Alternating 9:16 walls, reflective studio floor	Three.js WebGL + Scroll snap	Scroll depth + Click opens Cinema Modal
/contact	Inquiry & Site Visit	Editorial form, ₹2,000 Site Visit price card	Tailwind CSS + Form validation	Direct WhatsApp routing (+91 7075960672)

ARCHITECTURAL CONCLUSION

The BRANDSHOOTS platform establishes a new benchmark for creative studio websites by seamlessly marrying Three.js WebGL spatial computing with rigorous editorial typography and smooth kinetic scrolling. Every section reinforces the studio's uncompromising standard: **"WE CREATE STORIES. WE MAKE THEM MOVE."**
